

THANKS BE TO GOD FOR HIS INDESCRIBABLE GIFT! (2CO 9:15 NIV)

Dear brothers and sisters,

People can describe and detect powerful tsunamis; can measure the power of hurricanes, the power of earthquake magnitudes, can measure the heat and the cool. The scientists can measure the frequency, the speed and height of powerful wind and gigantic waves. Peoples' intelligence can detect and describe meteors and they can do so many other things. Yet there's ONE thing that people cannot achieve neither can describe and that is; "God's indescribable gift!"

Praise is to God for his gift which surpasses all wisdom and power. He blesses the humble and destroys the proud, the Lord lifts up those who had fallen on the ground and he heals their wounds, generates their strength and keeps them on the palm of his hands. There's nothing that can harm them because they trust and remain in Him!

This is a strong reason to proclaim and reflect God to those who do not know him, to those who are lost in the darkness.

Wednesday Bible classes

We started studying a new topic: "**Learning to forgive and to ask for Forgiveness!**" Altin is leading that class and this time he prepared some questions about forgiveness! It is always a real blessing to get shaped by the word of God, especially on this topic!

Children class,

Praise God on Friday we had the chance to meet together with children having games and nice time together. We thank God that has given to us the opportunity to spend some time with them and their parents.

Sunday worship,

As always it is wonderful and a great peace to get together and worshiping God by remembering, and celebrating Jesus into our hearts! Altin challenged us to "Rejoice on the real treasure" (Philip 4:4-8).

Prayer requests,

1. Pray for all the contacts that we have
2. Keep praying for Ketí
3. Keep praying for us

To His glory and power,

Altin, Edi and the church
